School of DENTISTRY

General Information

The University of Minnesota School of Dentistry improves oral and craniofacial health by educating clinicians and scientists who translate knowledge and experience into clinical practice. The school is committed to

- graduating professionals who provide the highest quality care and service to the people of the state of Minnesota and the world;
- discovering new knowledge through research, which will inspire innovation in the biomedical, behavioral, and clinical sciences; and
- providing oral health care to a diverse patient population in a variety of settings.

The School of Dentistry celebrated its centennial in 1988. In its long history, the school has developed an international reputation for education, research, and service. Its programs emphasize the scientific, scholarly, interpersonal communication and practice management skills required of general dentists, and dental specialists, therapists, hygienists, educators, and research scientists in a continually changing profession.

As part of the health sciences complex on the University's Minneapolis campus, the dental school's programs reinforce the important role that dental care plays in overall health and wellness. The school's main offices, classrooms, clinics, laboratories, reading and resource rooms are located in the Malcolm Moos Health Sciences Tower, a state-of-the-art setting for research, teaching, and practicing dentistry, dental hygiene, and dental therapy. Anatomy and histology laboratories are located in an adjacent building.

In this setting, students pursue a rigorous didactic and clinical education alongside other dental students with whom they will work after graduation. They develop psychomotor skills in the School of Dentistry's world class simulation clinic and treat patients in the dental school's campus-based and community-based clinics. This collegial approach to education ensures a solid educational and clinical preparation, collaboration between professions, and a single standard of care for patients.

Accreditation and Membership

The School of Dentistry is a member of the American Dental Education Association. The Program in Dental Hygiene is fully accredited by the Commission on Dental Accreditation. Although no formal accreditation currently exists for the Program in Dental Therapy, the School of Dentistry is accredited to teach all procedures to be performed by a dental therapist.

Admission

Applicants must complete the University of Minnesota's high school preparation requirements prior to entry into the professional program. See Admission and Prospective Student Services: Freshman Admission in the General Information section of this catalog.

The University's liberal education requirements must be completed prior to graduation from the program. If not completed prior to entry into the program, these requirements must be completed in conjunction with the curriculum while enrolled in the program.

Students enrolled at the University, Twin Cities campus or students transferring from the University of Minnesota coordinate campuses of Crookston, Duluth, Morris, or Rochester must complete an *Application for Undergraduate Change of College* form. This form, with instructions, is available online at www.onestop.umn.edu/onestop/Registration/Changing_College_or_Major.html. The completed form, along with any transcripts from any schools outside the University system, should be submitted to the One Stop Student Services Center (200 Fraser Hall, 130 West Bank Skyway, or 130 Coffey Hall) by the application deadline listed on the above website.

Students attending other regionally accredited colleges and universities apply by completing the University of Minnesota Transfer Application for Admission, available online at <http://admissions.tc.umn.edu/apply>. A complete list of required application materials are available at the website. For more information, see Transfer Admission in the General Information section of this catalog.

The School of Dentistry requires all applicants who are not native speakers of English to submit written evidence of a Test of English as a Foreign Language (TOEFL) score. A TOEFL score of 94 (Internet) is required. The TOEFL must be administered within two years before the date of application to either program.

To register for the TOEFL, contact the agency that handles TOEFL registration in your country, or the Educational Testing Service (ETS) at least 10 weeks before any scheduled test date. See "Admissions and Prospective Student Services" in the General Information section of this catalog for ETS contact information.]

Students admitted to the Division of Dental Hygiene or the Division of Dental Therapy and who require accommodation for a disability should contact Disability Services at 612-626-7379 before the beginning of the semester of entry into the program.

Tuition and Fees

For information on tuition, fees and estimated total expenses, consult the Class Schedule or the estimated expense information provided by the School of Dentistry, or visit www.dentistry.umn.edu. The School of Dentistry provides instruments and supplies. Students pay a usage fee.

Financial Aid

Students should apply for financial aid as soon as possible after January 1. For financial aid applications and information contact the Office of Student Finance, 200 Fraser Hall, University of Minnesota, Minneapolis, MN 55455-0422 (612) 624-1111.

Degrees

The School of Dentistry offers two baccalaureate degrees:

Bachelor of science (B.S.) in dental hygiene
(awarded by the Division of Dental Hygiene)

Bachelor of science (B.S.) in dental therapy
(awarded by the Division of Dental Therapy)

The curriculum for each of these programs offers a wide range of courses in:

- basic sciences;
- preclinical and clinical sciences;
- behavioral sciences;
- professional, interpersonal and communications skills; and
- practice management and business skills.

Teaching methods are tailored to course content and include traditional lectures, small group tutorials, cooperative learning teams, routine laboratories and advanced simulation, clinical practice in a comprehensive care facility, and community-based clinical experiences.

With career planning integrated into the core curriculum, students are assured a smooth transition from education into professional employment after graduation.

Policies

Students who have been admitted to the dental hygiene or dental therapy programs must submit documentation of immunizations required by the University and the Academic Health Center, and are strongly encouraged to have completed a physical assessment examination. Students must provide evidence of required immunizations during the first semester in the program.

The American Dental Association Commission on Dental Accreditation requires that all students be able to perform basic life support procedures, including cardiopulmonary resuscitation, and manage other medical emergencies. In compliance with this standard, students are required to take an American Heart Association Basic Life Support Training Course provided by the University of Minnesota Life Support Program and scheduled during the first semester in the program.

Applicants to the dental hygiene or dental therapy programs need to be aware of the Minnesota Dental Practice Act HIV and HBV Prevention Policy that affects applicants/students who are HIV and/or HBV positive. The Practice Act stipulates that:

- A licensed dental hygienist or therapist who is diagnosed as infected with HIV and/or HBV must report that information to the Commissioner of Health promptly and as soon as medically necessary for disease control purposes, but no later than 30 days after learning of the diagnosis or 30 days after becoming licensed in the state.
- The Minnesota Board of Dentistry may refuse to grant a license or may impose disciplinary or restrictive action against an HIV/HBV infected dental hygienist or therapist who fails to comply with any of the requirements of the Board or with any monitoring or reporting requirement.
- After receiving a report that a regulated person is infected with HIV and/or HBV, the Board of Dentistry or the commissioner of health shall establish a monitoring plan for the infected dental hygienist or therapist. This plan may address the scope of practice of the individual, required submission of reports, and other provisions that the Board deems reasonable.

Dental hygiene and dental therapy students are required to undergo a criminal background study (Criminal Background Study Under State Law, Minnesota Vulnerable Adult Act, as amended 1995 and 1996), in order to have direct contact with patients and residents in hospitals, extended care facilities, and other health care facilities licensed by the Minnesota Department of Health. Failure to pass this background study is grounds for dismissal from the program.

Advising

The School of Dentistry offers information/advising services to prospective students interested in dental hygiene or dental therapy. Group advising sessions are held each month, or on an appointment basis. To attend a group information/advising session, prospective students must register at www.healthcareers.umn.edu.

To schedule an individual appointment with a dental hygiene academic adviser, call 612-625-7190 or e-mail karni017@umn.edu.

The School of Dentistry provides a student support program to enhance the success of its students. Student performance is monitored and academic assistance is provided through tutoring and consultation. Counseling and advising are available through the Division of Dental Hygiene or the Division of Dental Therapy and through the School of Dentistry Office of Student Affairs. The University of Minnesota also provides counseling services at the Office of University Counseling and Consulting Services (612-624-3323).

Special Learning Opportunities and Resources

Community Outreach Clinics—Dental hygiene and dental therapy students participate in a number of off-campus Twin Cities and out-state Minnesota community clinics providing care to populations who typically do not have sufficient access to dental professionals.

Student Organizations

School of Dentistry Student Council—Each year dental hygiene, dental therapy and dental students elect the School of Dentistry Council of Students, which discusses matters of mutual interest with faculty advisers and promotes many projects and activities.

Student Affairs Committee—This committee is composed of dental hygiene, dental therapy and dental students and faculty members and is responsible for students' concerns such as membership in local and national organizations, ethics, counseling, tutorial assistance, questions on educational programs, financial aid, publications, housing, and alumni relations.

Student American Dental Hygienists' Association—Dental hygiene students participate in the student chapter of the national association, which represents concerns and issues related to the dental hygiene profession. Membership fees entitle students to various journals and special services.

Council for Health Interdisciplinary Participation (CHIP)—Dental hygiene and dental therapy students are encouraged to participate in the activities of the Academic Health Center CHIP.

Program in Dental Hygiene

General Information

The School of Dentistry's professional program in dental hygiene, established in 1920, has an illustrious record of accomplishment and innovation and is one of the country's premiere programs. It is fully accredited by the Commission on Dental Accreditation and is the only dental hygiene program in Minnesota that grants a baccalaureate degree and is affiliated with a school of dentistry.

Dental hygienists are preventive oral health professionals who have graduated from an accredited dental hygiene program in an institution of higher education and are licensed by states to practice dental hygiene. They provide educational, clinical, research, administrative, and therapeutic services supporting total health through the promotion of optimal oral health.

Dental hygienists practice in settings such as private dental offices and clinics; federal, state, and local health departments or associated institutions; hospitals and long-term care facilities; school districts or departments of education; educational programs for dental, dental hygiene, and dental assisting students; private business or industry; correctional facilities; private and public centers for pediatric, geriatric, and other groups or individuals with special needs; and health maintenance organizations.

The dental hygiene curriculum seeks to train students for a variety of dental hygiene roles and health care settings.

The program has developed a new, year-round calendar schedule, which will allow students to earn a bachelor of science degree in three years instead of four. Graduates complete a baccalaureate degree that blends a solid dental hygiene education with the biological, behavioral, and social sciences, as well as the liberal arts. The program emphasizes a strong commitment to community outreach and service, and to intellectual development and critical thinking.

Admission

The Division of Dental Hygiene sets its standards and requirements for admission. A strong interest in the natural sciences, and the social and behavioral sciences is required. The division recommends that applicants have a genuine interest in human services and promoting public health and welfare.

The dental hygiene curriculum consists of the preprofessional program in CLA or its equivalent at another regionally accredited institution and the professional program in the School of Dentistry, Division of Dental Hygiene.

Admission to the preprofessional program requires the student to meet the admissions criteria of individual colleges within the University and is subject to CLA's academic regulations or their equivalent at another institution. Admission to the preprofessional program does not guarantee admission to the professional program.

Admission to the dental hygiene program is competitive and occurs once a year for fall semester entry. Applications are accepted from September 15 until mid-January. Applications received after the deadline are not considered.

In addition to the application requirements listed for freshmen in the Admission and Prospective Student Services section of this catalog, high school graduates must also have a minimum 3.00 college GPA and show evidence of plans for completion of required pre-requisite coursework before proposed entry. Documentation indicating completion of all required prerequisite courses must be submitted to the Division of Dental Hygiene by August 15 of year of proposed entry. The ACT or SAT is also required.

Degrees

The School of Dentistry's Division of Dental Hygiene offers a bachelor of science degree.

The Division of Dental Hygiene also awards a professional degree, the master of dental hygiene degree (M.D.H.). For more information about the professional degree, visit www.dentistry.umn.edu/programsadmissions/advanced_programs/grad_hygiene.html.

Policies

Students in the professional program are subject to the regulations established by the Division of Dental Hygiene and must maintain satisfactory academic process.

Students not achieving satisfactory progress may be placed on scholastic probation upon recommendation of the Student Scholastic Standing Committee. Students' work is considered unsatisfactory when they earn less than a C- grade for any required dental hygiene course in a given year or semester. If students achieve an unsatisfactory grade in a required dental hygiene course, remedial work in the course may be provided, if possible; if not, students must repeat the course the next time it is offered. Earning unsatisfactory grades in two or more courses is sufficient basis for dismissal.

Dental hygiene students are required to undergo a criminal background study (Criminal Background Study Under State Law, Minnesota Vulnerable Adult Act, as amended 1995 and 1996), in order to have direct contact with patients and residents in hospitals, extended care facilities, and other health care facilities licensed by the Minnesota Department of Health. Failure to pass this background study is grounds for dismissal from the program.

Graduation Requirements

The B.S. degree in dental hygiene is awarded by the Regents of the University, upon recommendation of the faculty, for students who have fulfilled the requirements and met the standards for the degree. Degree requirements stipulate that dental hygiene students participate in a minimum of eight weeks of academic service-learning at School of Dentistry community outreach clinics.

Students with a cumulative GPA of 3.75 or higher are granted their degree "with distinction." Students with a cumulative GPA of 3.90 or higher are granted their degree "with high distinction."

Licensure and Placement

Graduates are eligible for licensure after successfully completing a written National Board Dental Hygiene Examination and a clinical examination, both of which are given on the University's Minneapolis campus. The licensed dental hygienist practices in accordance with the requirements of individual state dental

practice acts. In many states, a dental hygienist must participate in continuing education courses for license renewal.

The School of Dentistry provides placement assistance to dental hygiene graduates through the Minnesota Dental Placement Service at 612-626-0171.

Special Learning Opportunities and Resources

Continuing Dental Hygiene Education—Students are encouraged to participate in selected continuing education courses during their senior year on a space-available basis. These courses expose seniors to a broad scope of information and technology from a variety of local and national speakers. Students gain by selecting their own educational experiences and interacting with practicing dental hygienists and dentists.

International Student Exchange Program.—The Division Dental Hygiene has initiated a student exchange program with the University of Bergen, Norway. The goal of the program is to foster a common vision of a world where scientific knowledge, the best available technology, and human fiscal resources are widely disseminated to improve oral health in every region of the world.

Scholarships and Awards

Several scholarships and awards are presented annually by division faculty to selected dental hygiene students. For more information, call 612-625-9121.

Program in Dental Therapy

General Information

In 2009, the University of Minnesota School of Dentistry became the first dental school in the nation to create an educational program for dental therapists.

The dental therapist is a licensed oral health professional who practices as part of the dental team to provide educational, clinical, and therapeutic patient services. Dental therapists provide basic preventive and restorative treatment to children and adults, and extractions of primary (baby) teeth, under supervision by a dentist. Dental therapists work primarily in settings that serve low-income and underserved patients or in a dental health professional shortage area.

The baccalaureate degree prepares graduates to assume roles in a variety of health care environments, such as private general dental offices, group dental practices and community clinics. The program blends a solid dental clinical education, with the biological, behavioral, and social sciences, and the liberal arts. A commitment to community service and to intellectual development and critical thinking is emphasized.

Students enter the dental therapy program after completing one year of prerequisite college coursework. The year-round program allows students to complete the bachelor of science degree in 40 months, providing maximum opportunities for those eager to start their dental therapy careers. The program is the only dental therapy program in Minnesota that grants a baccalaureate degree and is affiliated with a school of dentistry. Dental therapy students take most courses with dental and dental hygiene students, and all students learn together in School of Dentistry clinics, which model a general dental practice.

Admission

The program admits students in the fall of each academic year. Applications are accepted from January 15 through April 15, usually during the student's freshmen year of college. Applications received after the deadline will be considered for the alternate list only. An application fee is required. The Division of Dental Therapy sets its standards and requirements. Admission is competitive. Notices of acceptance will be sent in the spring, with full matriculation the following fall.

Requirements for admission

- High school graduation; ACT (2400 minimum score) or SAT (1100 minimum score)
- Transcripts of all high school and college courses; minimum of 3.00 high school GPA (prerequisite, cumulative and science); minimum of 3.00 of college GPA
- Personal interview
- Transcripts documenting successful completion of the following prerequisite coursework

Documentation indicating completion of all admission requirements must be submitted to the Office of Admissions and Diversity by April 15 of the proposed year of entry. Send documentation to: Office of Admissions and Diversity, 15-163 Moos Health Science Tower, 515 Delaware St. S.E., Minneapolis, MN 55455.

Graduation Requirements

The B.S. degree in dental therapy is awarded by the Regents of the University, upon recommendation of the faculty, for students who have fulfilled the requirements and met the standards for the degree. Degree requirements stipulate that dental therapy students participate in a minimum of eight weeks of academic service-learning at School of Dentistry community outreach clinics.

Students with a cumulative GPA of 3.75 or higher are granted their degree "with distinction." Students with a cumulative GPA of 3.90 or higher are granted their degree "with high distinction."

Licensure and Placement

Dental Therapy licensure requirements are currently being approved by the Minnesota Board of Dentistry. Graduates will need to pass a comprehensive, competency-based clinical examination as well as an examination on the Minnesota laws and rules relating to the practice of dentistry.

Degree Programs

Dental Hygiene B.S.

Program in Dental Hygiene

- Required credits to graduate with this degree: 132.
- Required credits within the major: 90.
- This program requires summer terms.

Within the University's liberal arts curriculum, the baccalaureate program provides advanced knowledge and practice in both general university courses and dental hygiene theory and research methodology. It prepares the dental hygienist to assume roles in many different health care environments such as general and specialty practices, public schools, community health clinics, insurance companies, dental hygiene educational programs, extended care facilities, and in the health products industry.

Admission Requirements

Students must complete 33 credits before admission to the program.

Freshmen students are usually admitted to pre-major status before admission to this major.

All prerequisite courses must be taken A-F. Biology and chemistry must be taken within five years of entry into the program and one or the other must be completed prior to application so grades are on the transcript submitted at the time of application. In addition, applicants are strongly encouraged to have completed composition and psychology and/or sociology prior to application so grades are on the transcript submitted at the time of application.

For information about University of Minnesota admission requirements, visit the [Office of Admissions website](#).

Program Requirements

Year One Fall Courses

BIOL 1009—General Biology, BIOL (4 cr)
PSY 1001—Introduction to Psychology, SOCS (4 cr)
CHEM 1015—Introductory Chemistry: Lecture (3 cr)
CHEM 1017—Introductory Chemistry: Laboratory (1 cr)

Year One Spring Courses

COMM 1101—Introduction to Public Speaking, CIV (3 cr)
FSCN 1112—Principles of Nutrition (3 cr)
SOC 1001—Introduction to Sociology, SOCS (4 cr)
PHSL 3051—Human Physiology (4 cr)
PSTL 1135—Essentials of Human Anatomy and Physiology (4 cr)

Year Two Fall Courses

BIOC 2011—Biochemistry for the Agricultural and Health Sciences (3 cr)
DH 2111—Dental Anatomy (2 cr)
DH 2121—The Dental Hygiene Care Process Clinical Application I (5 cr)
DH 2132—Head and Neck Anatomy (1 cr)
MICB 3303—Biology of Microorganisms (3 cr)

Year Two Spring Courses

DH 2212—Dental Hygienist-Patient Relationship (2 cr)
DH 2215—Oral Histology and Embryology (2 cr)
DH 2221—Periodontology (3 cr)
DH 2222—Dental Hygiene Care Process Clinical Application II (3 cr)
DH 3151—Oral and Maxillofacial Radiology (2 cr)
DH 2231—Cariology and Applied Nutrition in Dental Hygiene Care (3 cr)

Year Two Summer Courses

DH 3120—General and Oral Pathology (2 cr)
DH 3121—Local Anesthesia and Pain Management (2 cr)
DH 3126—Oral and Maxillofacial Radiology Clinic I (0 cr)
DH 3123—The Dental Hygiene Care Process Clinical Application III (4 cr)
DH 3133—Pharmacology (2 cr)
DH 3134—Pediatric Dentistry (1.2 cr)

Year Three Fall Courses

DH 3211—Biomaterials and Principles of Restorative Techniques I (4 cr)
DH 3224W—Dental Hygiene Care Process Clinical Application IV, WI (4 cr)
DH 3227—Oral and Maxillofacial Radiology Clinic II (0 cr)
DH 3238—Dental Public Health and Academic Service Learning (3 cr)
DH 3228—Ethics and Jurisprudence for the Dental Hygienist (1 cr)
STAT 1001—Introduction to the Ideas of Statistics, MATH (4 cr)

Year Three Spring Courses

DH 4125W—Dental Hygiene Care Process Clinical Application V, WI (5 cr)
DH 4128—Oral and Maxillofacial Radiology Clinic III (0 cr)
DH 4135W—Research Methods in Dental Hygiene, WI (3 cr)
DH 4136—Periodontology III Lecture (1 cr)
DH 4139—Dental Public Health and Academic Service Learning II (2 cr)
WRIT 3562W—Technical and Professional Writing, WI (4 cr)
DH 4130—Management and Supervision of a Dental Practice (2 cr)

Year Three Summer Courses

DH 4226—Dental Hygiene Care Process Clinical Application VI (6 cr)
DH 4229—Oral and Maxillofacial Radiology Clinic IV (3 cr)
DH 4234—Leadership and Professional Development (2 cr)
DH 4211—Principles of Restorative Techniques II (3 cr)

Dental Therapy B.S.

Program in Dental Therapy

- Required credits to graduate with this degree: 127.
- Required credits within the major: 69 to 70.
- This program requires summer terms.

The program blends a strong dental therapy education with the study of the biological, behavioral, and social sciences and liberal arts. It provides didactic, laboratory, and clinical experiences required in assessment and treatment of specified dental procedures.

Admission Requirements

Students must complete 7 courses before admission to the program.

A GPA above 2.00 is preferred for the following:

- 3.00 for students already admitted to the degree-granting college.
- 3.00 for students transferring from another University of Minnesota college.
- 3.00 for students transferring from outside the University.

Personal interview.

For information about University of Minnesota admission requirements, visit the [Office of Admissions website](#).

Program Requirements

Biomedical Courses

BIOC 2011—Biochemistry for the Agricultural and Health Sciences (3 cr)
BIOL 1009—General Biology, BIOL (4 cr)
CHEM 1021—Chemical Principles I, PHYS (4 cr)
MICB 3303—Biology of Microorganisms (3 cr)
PHSL 3051—Human Physiology (4 cr)
PSTL 1135—Essentials of Human Anatomy and Physiology, BIOL (4 cr)
PSY 1001—Introduction to Psychology, SOCS (4 cr)
STAT 1001—Introduction to the Ideas of Statistics, MATH (4 cr)
WRIT 3562W—Technical and Professional Writing, WI (4 cr)
LAMP 4177—Nature of Disease: Pathology for the Health Professions (3 cr)

Clinical Courses

DT 3110—Periodontology I (1 cr)
DT 3130—Preclinical Pediatric Dentistry (2 cr)
DT 3211—Applied Pharmacology for the Dental Therapist (2 cr)
DT 3212—Local Anesthesia and Pain Management (2 cr)
DT 3230—Oral and Maxillofacial Radiology (2 cr)
DT 3232—Oral and Maxillofacial Radiology Preclinical Laboratory (1 cr)
DT 3250—Oral Histology and Embryology (2 cr)
DT 3331—Provider Patient Relationships (2 cr)
DT 3332—Cariology and Applied Nutrition in Dental Therapy Care (3 cr)
DT 3333—Dental Public Health and Academic Service Learning I (2 cr)
DT 3334W—Dental Therapy Care Process: Clinical Application II, WI (2 cr)
DT 3336—Ethics and Jurisprudence for the Dental Therapist (1 cr)
DT 3337—Dental Public Health and Service Learning II (2 cr)
DT 3338W—Research Methods in Dental Therapy, WI (3 cr)
DT 3410—Applied Dental Biomaterials (1 cr)
DT 3430—Oral Anatomy (2 cr)
DT 3431—Oral Anatomy Laboratory (2 cr)
DT 3432—Operative Dentistry I (2 cr)
DT 3433—Operative Dentistry I Pre-Clinic Laboratory (2 cr)
DT 3434—Operative Dentistry II for the Dental Therapist, Lecture and Lab (3 cr)
DT 4140—Preventive Pediatric Dentistry Clinic (1 cr)
DT 4141—Pediatric Dentistry Clinic Rotation (1 cr)
DT 4240—Oral Radiology Clinic (1 cr)
DT 4320—Comprehensive Care Clinic (1 cr)
DT 3335—Management and Supervision of a Dental Practice (1 cr)
DT 4440—Operative Dentistry Clinic (2 cr)
DT 4142—Clinical Pediatric Dentistry II (1 cr)
DT 4241—Oral Radiology Clinic II (1 cr)
DT 4323—Comprehensive Care Clinic II (1 cr)
DT 4339—Team Building Within the Oral Health Care Setting (1 cr)
DT 4360—Outreach Experiences in Dental Therapy (2 cr)
DT 4441—Operative Clinic II (0 cr)
DT 4143—Clinical Pediatric Dentistry III (1 cr)
DT 4242—Oral Radiology Clinic III (1 cr)
DT 4324—Comprehensive Care Clinic III (1 cr)
DT 4361—Outreach Experiences II (2 cr)
DT 4442—Operative Clinic III (2 cr)
DT 3210—Head and Neck Anatomy (1 cr)
DT 3429—Introduction to Psychomotor Skill Development (1 cr)
DT 3330—Clinical Application I (3 cr)
DT 3521—Foundations of Interprofessional Professionalism, Communication and Collaboration (1 cr)
DT 3231—Oral and Maxillofacial Radiology II (1 cr)
